
Project Listing and Maps

The following pages list projects planned for fiscal years 2000-2004. A brief description and schedule is provided. An accompanying map shows the project location. All projects are listed in alphabetical order.

Intergovernmental Agreements (IGA)

The County enters into IGAs with other governmental agencies when roadway projects are to be jointly funded or other services are to be provided. Typically, the IGA describes the terms, conditions, schedule and costs for each agency signing the agreement. The IGA must be approved by the Board of Supervisors as well as the governing body of each agency. When signed, it is recorded with the County recorder and becomes public record. When all the terms of the IGA are satisfied, the agreement is completed and closed.

Reimbursements

Negative numbers shown in some of the following project tables represent reimbursements received from partnering cities and towns through an IGA. The reimbursements may be one time payments or annual installments over several years.

TIP Project Schedules

The TIP project schedules on the following pages represent estimated schedules by major activity:

- Design - including Design Concept Reports and preliminary engineering design;
- Right-of-way including the acquisition of land and/or legal access to land; and
- Construction - including utility relocation, environmental considerations and actual construction

These project schedules reflect the earliest possible schedule per major activity. It is MCDOT policy to rush all projects to construction. Funds will be programmed on a “first ready, first fund” basis subject to funding availability. For example, the old US 80 project may potentially be advanced to FY 2002 pending all project elements are completed early.
